SOFTWARE PROJECTS

KidzBlocks

Jan 2022 – Current

- Developing Educational website for students grade 1-6, for learning and expanding skills.
- Utilizing React framework, to build the front-end and various interactive games.

Amazon Review Program

Aug – Dec 2022

- Performed exploratory data analysis on amazon data for determining product performance.
- Led the 2nd sprint to spear head the building of the GUI for the program. Built the foundations for the GUI that enabled us to implement more features.

My/City

- Performed data collection from participating users, to determined which state in the U.S. would best suite them.
- Led the Frontend-development of the website using Python, HTML, and CSS. Along with using Flask as our backend.
- Deployed using fly.io to host our website.

Employment Experience

Blue Chip

June 2019 – July 2019

Account Manager

Austin, TX

- Traveled to Fortune 500 companies and met new customers face-to-face about the company's product.
- Managed up to 4 accounts at a given time.
- Talked to 100+ potential customers to answer any question about the company's product.
- Consult with other managers to better approach customers about new insight into the company's product.
- Gathered information from customers about how we could improve the product.
- Provided on site exceptional customer service and ensured clients' needs were met.
- Performed opening and closing procedures ensuring all tasks are completed accurately.
